

STUDY AUTOMOTIVE SERVICING TECHNOLOGY AT KIT

THE KIT DIFFERENCE

- This course is delivered by KIT, taught to Australian standards and is subject to on-going quality assurance checks. It builds the same skills, knowledge and attitudes as an Australian equivalent course.
- Our dedicated staff are consistently up-skilled and trained by specialised short and long term Australian technical advisers.
- The KIT campus provides a friendly, safe and clean environment to learn in, with all the latest equipment for practical training.
- All students participate in relevant practical activities and learn work related technical skills.
- Students also learn core employability skills, computing skills and English language so that they are confident and work ready.

COURSE DURATION

- The Certificate II Automotive Servicing Technology course is delivered over six terms.
- During the first term, all also students undertake a Vocational Preparation Course.

STUDYING CERTIFICATE II IN AUTOMOTIVE SERVICING TECHNOLOGY

This course covers the skills and knowledge required to perform a range of servicing operations on light vehicles, heavy vehicles and/or motorcycles within an automotive service or repair business.

WHAT YOU WILL LEARN

- Apply environmental and sustainability best practices
- Apply safe working practices
- Use and maintain workplace tools and equipment
- Carry out servicing operations
- Inspect and service engines
- Inspect and service cooling systems
- Inspect and service batteries
- Inspect and service steering systems
- Inspect and service suspension systems
- Inspect and service braking systems
- Service petrol fuel systems
- Service diesel fuel injection systems
- Balance wheels and tyres
- Remove, inspect, repair and fit tyres tubes
- Test, charge and replace batteries
- Service final drive assemblies and drivelines
- Inspect and service transmissions (manual and auto)
- Identify basic automotive faults using troubleshooting processes
